Forward Looking Statements

TRIUMPH GOLD

Certain of the statements contained in this presentation, including, without limitation, statements regarding the anticipated content, commencement and cost of exploration programs, anticipated exploration program results, the discovery and delineation of mineral deposits/resources/reserves, the anticipated preparation and timing of an updated 43-101 resource estimate, the potential for a significant expansion of the resource, the economic outlook for the gold mining industry, Triumph Gold's (the Company) expectations regarding gold prices and production, and its future liquidity and capital resources and planned expenditures, are forward-looking statements. Information concerning mineral resource estimates may also be deemed to constitute forward-looking statements in that these statements reflect predictions of mineralization that would be encountered if a mineral deposit were to be developed and mined. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct.

Accordingly, the Company cautions that any forward-looking statements are not guarantees of future results or performance, and that actual results may differ materially from those set out in the forward-looking statements as a result of; among other factors, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company's inability to obtain any necessary permits, consents or authorizations required for its activities, material adverse changes in economic and market conditions, changes in the regulatory environment and other government actions, fluctuations in commodity prices and exchange rates, the inability of the Company to raise the necessary capital for its ongoing operations, and business and operational risks normal in the mineral exploration, development and mining industries, as well as the risks and uncertainties disclosed in the Company's most recent Management Discussion and Analysis. The Management Discussion and Analysis is filed with certain provincial securities commissions in Canada, available at www.sedar.com. The Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events.

All subsequent written or oral forward-looking statements attributable to the Company or any person acting on its behalf are qualified by the cautionary statements herein. Marty Henning, P. Geo., Principal Geologist of Triumph Gold Corp., is the qualified person, as defined by NI 43-101, and has reviewed the technical information in this corporate presentation. Links to references are imbedded in the following slides for additional information.

Leadership and Management Team

TRIUMPH GOLD

John Anderson – Interim CEO and Chairman

- 20 years' resource sector capital marketing experience
- Strategic company growth and management

Brian Bower – Lead Director

- 30 years' experience in exploration and mining
- Key member in project development: New Afton, Kemess South, Blackwater, Mount Milligan Mines and Casino

Marty Henning, P.Geo – Principal Geologist

- 15+ years' mineral exploration and mining experience
- Focused on construction, production and exploration at the New Afton block cave mine

Graeme Hopkins – Chief Technical Officer

- 20 years' Data Management and GIS experience
- Involved with the Freegold Mountain Project since 2008

Jesse Halle, P.Geo – VP Exploration

- 25+ years' experience in exploration
- Advance multiple porphyry copper-gold deposits in Yukon and BC, including Casino and Copper Mountain deposits

Emily Halle, PMP – Project Manager

- 15+ years' experience in exploration and project management
- Focused on porphyry copper-gold systems in British Columbia and Yukon, with additional experience in South Africa, Alaska and Eastern Canada

At present, the company has issued a total of 52,060,600 shares. The current stock price is 0.235 CAD per share (2025-03-20), and the total value of market capitalization is \$12.2 million CAD.

Freegold Mountain Project Overview

Triumph Gold is a gold explorer focused on its 100% owned district-sized **Freegold Mountain Project**.

- The project is in the Dawson Range gold-copper belt, host to Newmont's *Coffee Deposit*, Western Copper's *Casino Deposit*, Pembridge's *Minto Mine*, Rockhaven's *Klaza Project* and Granite Creek's *Carmacks Deposit*.
- Accessible on all weather government road
- Over 20 mineralized zones identified along Triumph Gold's 34 km stretch of the prolific Big Creek Fault mineralization system

Freegold Mountain Project Overview

Mineralization Hosted in Every Rock Type

Paleozoic Metamorphics (YTT) (blue)

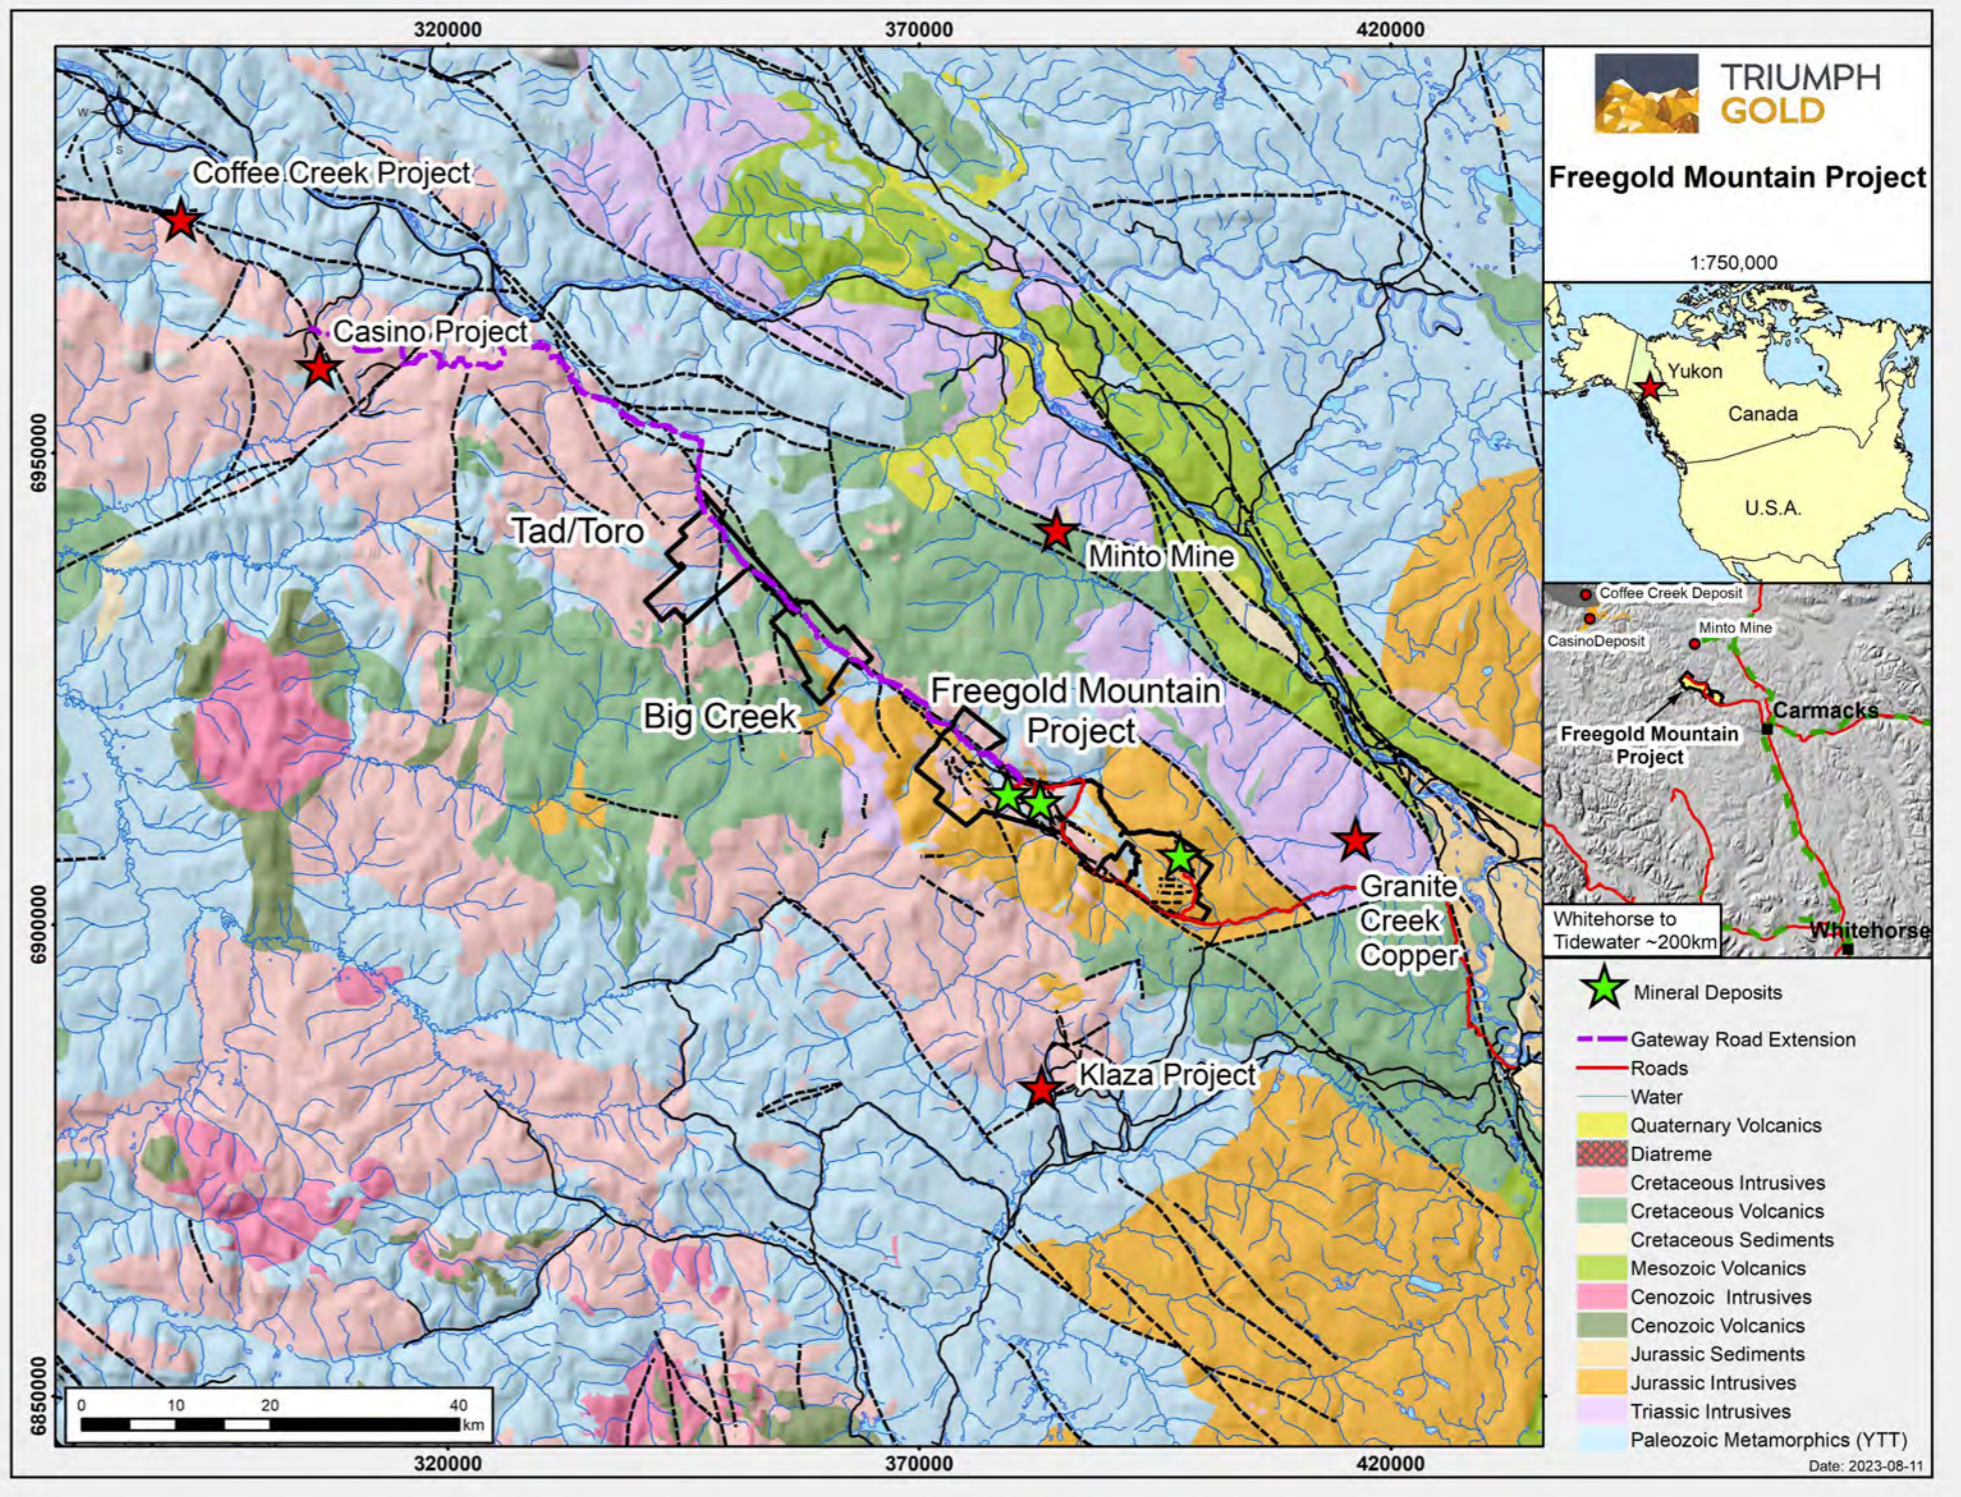

Lithology: Snowcap Assemblage: mica schist/gneiss, amphibolite, quartzite, marble
Prospects: Nucleus, Melissa, Irene, Guder, Red Fox, Granger, Combo, Dart, Goldy, and Castle
Mineralization: Skarn (Au-Ag-Cu), Epithermal (Au-Ag-Cu)

Jurassic Intrusives (orange)

Lithology: Quartz Monzonite to Diorite
Prospects: Tinta Hill, Field, and Com
Mineralization: Polymetallic (Au-Ag-Pb-Zn)

Cretaceous Intrusives (pink)

Lithology: Granodiorite to Leucogranite, Quartz Feldspar Porphyry
Prospects: Nucleus, Revenue, Granger, Stoddart, Ridge, Nitro, and Cabin
Mineralization: Porphyry(Au-Cu-Ag-Mo), Epithermal (Au-Ag-Cu)

2021 Nucleus Drilling: North, Main, Big Creek South and Orbit

TRIUMPH GOLD

2021 Nucleus Exploration Summary – 3,565 m (12 holes)

Main Resource (N21-01, N21-02, N21-04, N21-06, N21-07, N21-10)

- 1,938 m diamond drilling, (6 holes)
- Testing the “Four Corners” of the resource
- 2 holes stepping out ~300 m of the southern limit of the \$1500 pit shell
- Expanded mineralization 50-100 m laterally and vertically
- Confirmed epithermal gold and skarn mineralization

North Resource (N21-08, N21-09, N21-11)

- 776 m diamond drilling (3 holes)
- Previous resource based on RAB drilling
- Intersected up to 150 m of oxidation vertically
- Confirmed epithermal oxide gold mineralization

Big Creek South Fault (N21-03, N21-05)

- 608 m diamond drilling (2 holes)
- Maiden holes testing geophysical anomalies
- Intersected up to 19 m of replacement-style mineralization

Orbit (O21-01)

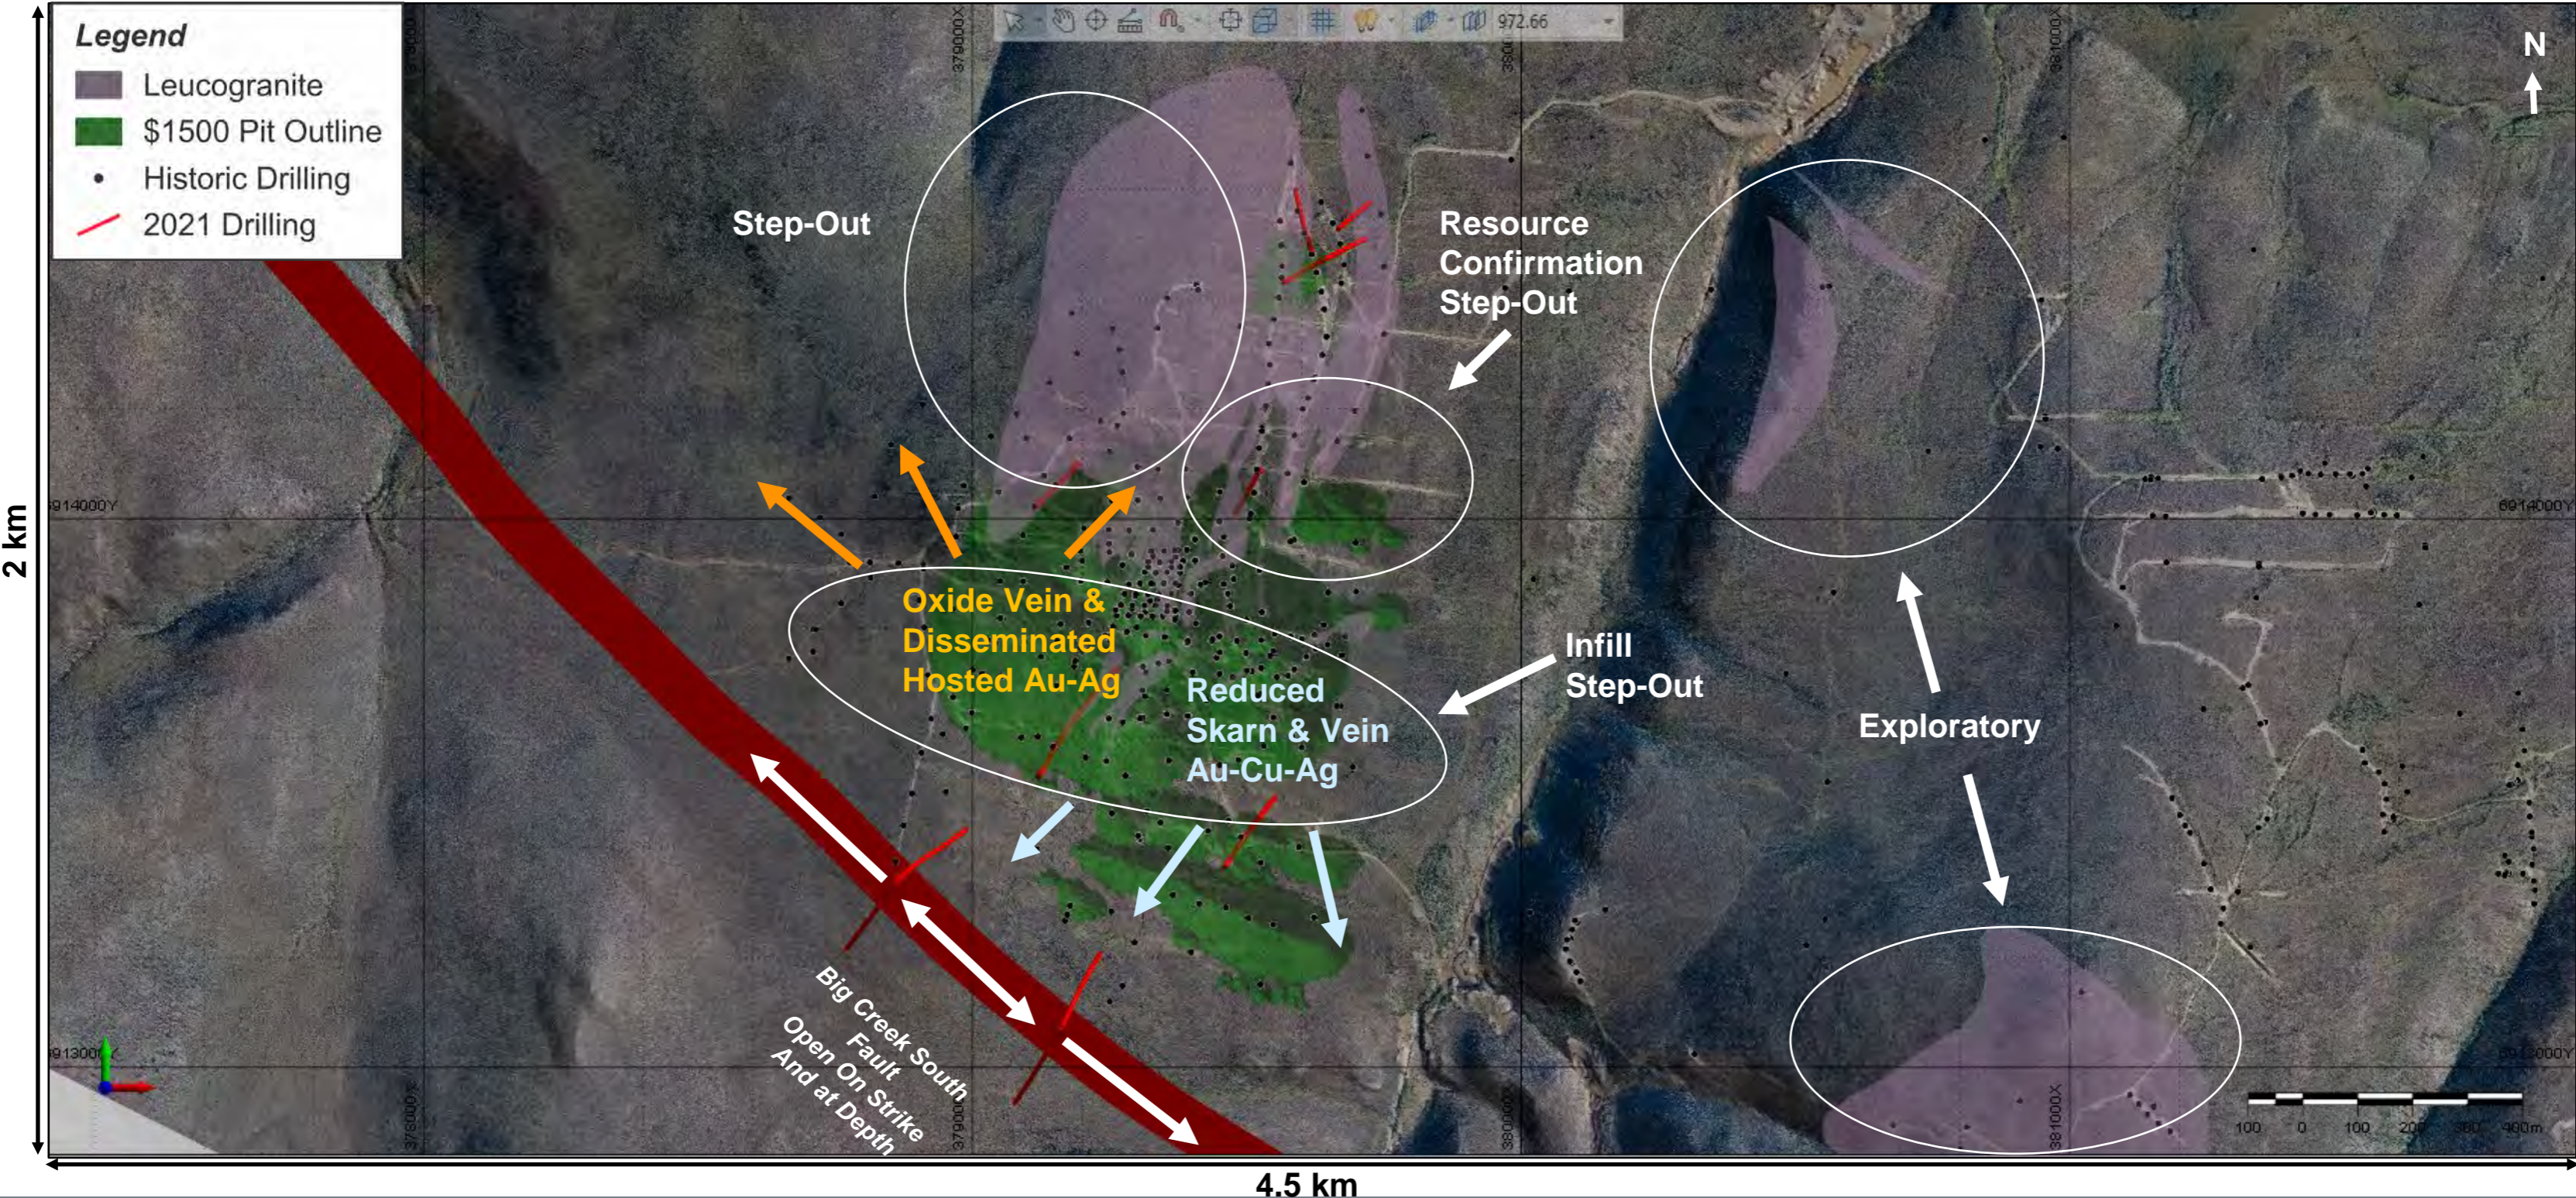

- 242 m diamond drilling (1 hole)
- Maiden hole testing copper mineralization at surface
- Intersected epithermal mineralization
