

This Management's Discussion & Analysis ("**MD&A**") reflects information as of April 23, 2021.

This MD&A for Triumph Gold Corp. (the "**Company**") provides a discussion of the Company's financial and operating results for the fiscal year ended December 31, 2020 and should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2020 and accompanying notes. All dollar amounts are stated in Canadian dollars.

Caution Regarding Forward-Looking Information

This MD&A contains forward-looking statements and forward-looking information (collectively, "**forward-looking statements**") within the meaning of applicable Canadian securities legislation. These statements relate to future events or the future activities or performance of the Company. All statements, other than statements of historical fact are forward-looking statements. Information concerning mineral resource estimates also may be deemed to be forward-looking statements in that it reflects a prediction of the mineralization that would be encountered if a mineral deposit were developed and mined. Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or which by their nature refer to future events.

These forward looking statements are made as of the date hereof and the Company does not intend and does not assume any obligation, to update these forward looking statements, except as required by applicable law. For the reasons set forth above, investors should not attribute undue certainty to or place undue reliance on forward-looking statements.

Overview

The Company is a junior natural resource company currently engaged in the acquisition, exploration and, if warranted, the development of mineral properties of merit in the Yukon Territory and British Columbia, Canada. All of the properties in which the Company currently holds interests are in the exploration stage. The Company funds its operation primarily through the sale of its equity securities.

Summary of Annual Financial Information

The Company's consolidated financial statements for the year ended December 31, 2020 (the "**Financial Statements**") have been prepared in accordance with International Financial Reporting Standards ("**IFRS**"). The following table provides a brief summary of the Company's financial operations for the years ended December 31, 2020, 2019 and 2018. For more detailed information, refer to the Financial Statements.

Annual Information			
	December 31, 2020	December 31, 2019	December 31, 2018
	\$	\$	\$
Loss before other items	(5,290,377)	(5,826,845)	(8,956,950)
Total other items	259,819	598,868	152,304
Loss for the year	(5,030,558)	(5,227,977)	(8,804,646)
Loss per share	(0.04)	(0.06)	(0.12)

Annual Information			
	December 31, 2020	December 31, 2019	December 31, 2018
	\$	\$	\$
Total assets	7,967,523	4,678,738	4,096,586
Total non-current liabilities	156,219	50,000	50,000
Cash dividends per share	Nil	Nil	Nil

For the year ended December 31, 2020, the Company incurred a net loss of \$5,030,558 (2019 - \$5,227,977).

The major component in the decrease in expenses were exploration expenditures on the Company's Freegold Mountain project and Tad/Taro project of \$1,364,632 during fiscal 2020, compared to \$2,522,306 during fiscal 2019. Other than a 83% increase in share based payments from \$908,321 in fiscal 2019 to \$1,662,139 in fiscal 2020, all other expenses remained relatively static for fiscal 2020 compared to fiscal 2019.

In current assets, cash increased from \$923,110 at December 31, 2019 to \$4,268,216 at December 31, 2020 as the Company carried out private placement financings during fiscal 2020. As of December 31, 2020, the Company had a working capital of \$4,161,695, compared to a working capital of \$948,966 as of December 31, 2019.

Summary of Quarterly Financial Information

	31 Dec 2020 \$	30 Sept 2020 \$	30-Jun 2020 \$	31-Mar 2020 \$	31-Dec 2019 \$	30-Sep 2019 \$	30-Jun 2019 \$	31-Mar 2019 \$
Total other income (loss)	(1,210)	52,407	4,142	606	20,490	450	77	310
Loss for the period	(816,515)	(2,691,763)	(547,599)	(974,681)	(1,020,366)	(2,295,179)	(1,179,342)	(733,090)

Total assets	7,967,523	8,749,474	3,940,231	4,445,786	4,678,738	5,761,638	6,256,978	3,784,394
Total current liabilities	296,850	371,177	395,350	435,065	463,872	286,692	770,302	255,371
Cash dividends per share	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil

For the three months ended December 31, 2020, the Company incurred a comprehensive loss of \$816,515 (2019 - \$1,020,366). The decrease in the loss was primarily a result of increased corporate communications activities, professional fees and share based payments during Q4 2019.

Corporate communications in Q4 2020 was \$191,921, compared to \$464,350 for Q4 2019. Professional fees during Q4 2020 were \$37,678, compared to \$105,589 for Q4 2019. Share based payments during Q4 2020 were \$101,697, compared to \$294,408 for Q4 2019.

During Q4 2020, administrative expenses of \$81,825 (2019 - \$82,102), exploration expenditures of \$252,572 (2019 \$277,590), listing and filing fees of \$8,222 (2019 - \$6,558) and wages and salaries of \$110,472 (2019 - \$98,555) remained relatively static for fiscal 2020 compared to fiscal 2019.

As of April 23 2021, the Company had 138,844,229 common shares issued ("**Shares**"), and 39,536,759 share purchase warrants ("**Warrants**") and 13,585,000 stock options outstanding.

Liquidity and Capital Resources

The Company has no revenue generating operations from which it can internally generate funds. The Company's ability to meet its obligations and its ability to finance exploration and development activities depends on its ability to generate cash flow through the issuance of Shares pursuant to private placements, the exercise of Warrants and stock options, through the issuance of debt or through the sale of interests in its mineral properties. There are no assurances that the Company will continue to obtain additional financial resources and/or achieve positive cash flows or profitability. If the Company is unable to obtain adequate additional financing, the Company will be required to curtail operations and exploration activities.

The Company owns all of its mineral properties 100% and all principal mineral claims have assessment credits to 2027 and beyond, so the Company has no immediate requirement to spend money on exploration in order to maintain its mineral properties. Commencing in 2017, the Company is committed to pay \$40,000 annual advanced royalty payments in order to maintain the Tinta Hill, Freegold and Goldstar properties. The advanced royalty payment will be netted against royalty interest payments after commencement of commercial production.

As at December 31, 2020, the Company had working capital of \$4,161,695 (2019 – \$948,966) which includes cash and cash equivalents of \$4,268,216 (2019 - \$923,110), trade and other receivables of \$14,828 (2019 - \$19,203), prepayments and deposits of \$175,501 (2019 - \$470,525), which are offset by trade and other payables of \$204,600 (2019 - \$229,458), deferred premium on flow-through shares of \$Nil (2019 - \$203,874) and lease liability of \$92,250 (2019 - \$30,540).

During the year ended December 31, 2020, the Company issued 6,865,476 Shares pursuant to the exercise of Warrants for gross proceeds of \$617,893 and issued an aggregate of 32,283,500 Shares pursuant to private placement financings as more particularly described below, for total gross proceeds of \$6,456,700.

The Company expects that it will operate at a loss for the foreseeable future. The Company believes that it has enough cash and cash equivalents to fund its overhead through December 31, 2021.

There has been a global pandemic outbreak of COVID-19. The actual and threatened spread of the virus globally has had a material adverse effect on the global economy and, specifically, the regional economies in which the Company operates. The pandemic could continue to have a negative impact on the stock market, including trading prices of the Company's shares and its ability to raise new capital. These factors, amongst others, could have a significant impact on the Company's operations. As a result, there exists material uncertainty that casts significant doubt about the Company's ability to continue as a going concern.

The Company is committed to the health and safety of its employees and contractors. With recommendations from the Yukon Government and Yukon Chamber of Mines, the Company developed and implemented infection prevention and control measures at the Freegold Mountain Property to help reduce and minimize the risk of potential COVID-19 transmission in the camp and at related work sites. Employees, contractors, and visitors were regularly monitored for symptoms and required to review and adhere to current federal and territorial regulations, as well as Company

prevention policies outlined in the Company's COVID-19 Operational Plan while on site. Should anyone on site have shown COVID-19 or symptoms of COVID-19, all employees would have been required to follow the Company's COVID-19 Emergency Response Plan. All camp employees and service providers were sourced from the Yukon, with the exception of the Company's corporate management, who followed regulations and guidelines upon entering the Territory.

Financing

On July 17, 2020, the Company completed non-brokered private placement of 16,598,500 units at a price of \$0.20 per unit for aggregate gross proceeds of \$3,319,700. Each unit consists of one common share and one transferable common share purchase warrant of the Company. Each whole warrant is exercisable into one common share at an exercise price of \$0.30 per share for a term of three years. Share issuance costs and finders' fees of \$121,476 were paid in connection with the private placement. The Company also issued 274,645 finders' warrants, which were recorded at a fair value of \$39,571. The fair value was estimated using the Black-Scholes Option Pricing Model assuming an expected life of three years, expected dividend yield of 0%, a risk-free interest rate of 0.28%, share price on grant date of \$0.20 and an expected volatility of 80.25%. The finders' warrants are exercisable at a price of \$0.25 until July 17, 2023.

The Company completed non-brokered private placement in tranches as to 15,000,000 units on July 24, 2020 and 685,000 units on December 30, 2020, for a total of 15,685,000 units at a price of \$0.20 per unit for aggregate gross proceeds of \$3,137,000. Each unit consists of one common share of the Company and one common share purchase warrant. Each warrant is exercisable into one common share at an exercise price of \$0.30 per share for a term of three years. Share issuance costs and finders' fees of \$235,110 were paid in connection with the private placement. The Company also issued 627,200 finders' warrants, which were recorded at a fair value of \$110,453. The fair value was estimated using the Black-Scholes Option Pricing Model assuming an expected life of three years, expected dividend yield of 0%, a risk-free interest rate of 0.27%, share price on grant date of \$0.20 and an expected volatility of 80.55%. The finders' warrants are exercisable at a price of \$0.25 until July 24, 2023.

Mineral Exploration Properties

The Company separates its exploration properties into three geographical locations; namely Freegold Mountain, Yukon, Other, Yukon and Andalusite Peak, BC, as more particularly described below.

The Freegold Mountain project is comprised of the following exploration properties:

Tinta Hill Property, Yukon

The Company holds a 100% interest in the Tinta Hill Property subject to an annual advanced royalty payment of \$20,000 and a 3% net smelter return ("NSR"). The advanced royalty payment will be netted against royalty interest payments after commencement of commercial production. Of the 3% NSR, the Company can elect to purchase 2% at a cost of \$250,000 for the first 1% and \$1,000,000 for the second 1%.

As at December 31, 2020, total advanced royalty payment made was \$80,000 (2019 – \$60,000). During the year ended December 31, 2020, the Company paid \$7,304 (2019 - \$Nil) in filing fees for

the Tinta Hill Property.

Freegold Property, Yukon

The Company holds a 100% interest in the Freegold Property subject to an annual advanced royalty payment of \$ 10,000 and a 3% NSR. The advanced royalty payment will be netted against royalty interest payments after commencement of commercial production. Of the 3% NSR, the Company can elect to purchase 2% at a cost of \$250,000 for the first 1% and \$1,000,000 for the second 1%.

As at December 31, 2020, total advanced royalty payment made was \$40,000 (2019 – \$30,000). During the year ended December 31, 2020, the Company paid \$7,304 (2019 - \$Nil) in filing fees for the Freegold Property.

Goldstar Property, Yukon

The Company holds a 100% interest in the Goldstar Property subject to an advance payment of \$10,000 and a 3% NSR. The advanced royalty payment will be netted against royalty interest payments after the commencement of commercial production. Of the 3% NSR, the Company can elect to purchase 2% at a cost of \$500,000 for the first 1% and \$1,000,000 for the second 1%

As at December 31, 2020, total advanced royalty payment made was \$40,000 (2019 – \$30,000).

Golden Revenue Property, Yukon

The Company holds a 100% interest in the Golden Revenue Property, subject to a 1% NSR in favour of ATAC Resources Ltd on that portion of the property which is not subject to an underlying royalty. There is a 2% underlying NSR on a portion of the property. A total of 75% of the underlying NSR (1.5% NSR) may be purchased at any time for \$600,000. On June 13, 2018, the Company acquired the underlying NSR for a purchase price of \$100,000, thereby conveying the exclusive right to be paid all future rights associated from the NSR to the Company.

During the year ended December 31, 2020, the Company paid \$7,303 (2019 - \$Nil) in filing fees for the Golden Revenue Property.

Tad/Toro Property, Yukon

The Company holds a 100% interest in the Tad/Toro Property subject to a 3% NSR, of which the first 1% may be purchased for \$500,000 and a second 1% for \$1,000,000.

During the year ended December 31, 2020, the Company paid \$3,050 (2019 - \$Nil) in filing fees for the Tad/Toro Property.

Andalusite Peak, British Columbia

The Company staked the Andalusite Peak Property and held a 100% interest. On August 8, 2019, the Company and Rio Tinto Exploration Canada Inc. ("RTEC") entered into an option agreement whereby RTEC has the option to obtain a 100% interest in the Andalusite Peak property. Under the terms of the option agreement, 100% ownership of the claims were transferred to RTEC and RTEC agreed to pay \$3,000,000 over a five-year option period and reserve for the Company a 1% net

smelter returns royalty, which is capped at \$50 million. 100% interest in the Andalusite Peak property will be returned to the Company if RTEC opts out of the staged payments totaling \$3,000,000 over the five year option period. The sum of \$25,000 was paid to the Company (of which \$10,420 has been credited against exploration and evaluation assets and the excess of \$14,580 over the carry amount was recognized in other income during the year ended December 31, 2019) within 45 days of the option agreement date. A further \$50,000, was payable on or before the first anniversary date of the option agreement. The payment was received on July 21, 2020 and recognized in other income during the year ended December 31, 2020. On December 15, 2020, RTEC provided notice of termination of the option agreement and 100% ownership of the Andalusite Property was transferred back to the Company.

On a regular basis the Company evaluates the potential impairment of its mineral property interests under IFRS 6 when facts and circumstances indicate that the carrying value of a mineral property may exceed its recoverable value. All properties are early stage exploration properties.

The Company has defined, indicated and inferred mineral resources in three separate deposits on the Freegold Mountain property as documented in a current NI 43-101 technical report. Management believes that its carrying value is fully recoverable.

The majority of exploration expenditures made by the Company in 2020 were related to the field campaign at the Company's Freegold Mountain Project. The 2020 program was designed to test near-surface gold targets in both the Nucleus-Revenue and Mount Freegold areas. Field exploration proceeded as planned, although access to the Irene-Goldstar Corridor and Melissa Zone was limited due to unusually high rainfall throughout the season. This year's exploration program produced nine diamond drill holes totaling 2068.52 metres, plus minor trenching and reconnaissance sampling. Highlights of the exploration activity include:

- Drill testing an anomaly identified by the recent drill hole-constrained 3D magnetic inversion model at **Keirsten Zone**, intersecting well sulphidized and magnetic porphyry copper-gold alteration and mineralization;
- Drill testing an anomaly identified by the recent drill hole-constrained 3D magnetic inversion model at **Revenue East**, intersecting altered rocks containing visible gold, chalcopyrite, arsenopyrite, bismuthinite, molybdenite, and scheelite;
- Inaugural drilling at **Keirsten South**, located over one kilometre south of the Keirsten Zone, intersecting new and prospective copper bearing rocks, also related to porphyry copper-gold mineralization;
- Trench sampling of new bedrock exposed by ongoing placer gold mining at **Happy Creek**, revealing pyritic plutonic rock containing chalcopyrite;
- Drill testing a fence of holes within the **Irene-Goldstar Epithermal Corridor** (PR20-03), revealing multiple broadly-mineralized zones containing arsenopyrite and local trace chalcopyrite, sphalerite, and galena in schists and gneiss;
- Intersection of the high-grade epithermal **Goldstar Vein** approximately 50 vertical metres below the previously tested extent of the vein, implying continuity of the Goldstar Vein to at least 100 metres down dip; and

- Reconnaissance sampling of fresh subcrop along a new access road to the **Melissa Zone**, exposing a massive stibnite vein amongst numerous quartz-feldspar porphyry dikes in locally hornfelsed and pyritic schist and gneiss containing thick, cross-cutting quartz veins.

On January 26th, 2021, the Company announced the drill results of the 2020 exploration program, including near-surface gold discoveries and extension of the high-grade Goldstar vein, the highlights of which included:

- Within the Irene-Goldstar Epithermal Corridor, 2020 drilling successfully tested the down-dip extension of the Goldstar Vein and validated the continuity of the system with long step-outs (up to 570 metres) into untested portions of the corridor intersecting multiple parallel gold-rich zones. Results include:
 - Extension of the high-grade Goldstar Vein by over 85 metres down dip in IGC20-03 with
 - 1.59 g/t Au, 96 g/t Ag, and 2.3% Cu over 1.56m (152.00 to 153.56m), including 4.59 g/t Au, 200 g/t Ag, and 6.9% Cu over 0.50m (153.06 to 153.56m)
 - Extension of the Skarn Zone by 570 metres to the northwest in IGC20-01 with the intersection of near-surface high-grade gold and silver in massive magnetite assaying
 - 1.12 g/t Au and 15.6 g/t Ag over 7.23m (27.82 to 35.05m), including 7.49 g/t Au and 37 g/t Ag over 1m (33.00 to 34.00m)
 - Discovery of near-surface gold and silver rich zones in multiple holes along the Irene-Goldstar Epithermal Corridor including
 - 0.89 g/t Au, 22 g/t Ag, and 0.17% Cu over 9.75m (48.16 to 57.91m) in IGC20-01, including 1.47 g/t Au, 35 g/t Ag, 0.23% Cu, 0.05% Pb and 0.11% Zn over 5.58m (49.18 to 54.76m), and
 - 1.81 g/t Au and 8.6 g/t Ag over 7.62m (42.67 to 50.29m) in IGC20-02, including 2.87 g/t Au and 12 g/t Ag over 4.57m (42.67 to 47.24m)
 - In the Revenue-Nucleus Area, drilling outside of known porphyry copper-gold mineralization resulted in multiple intersections of greater than 1 g/t gold, as well as the discovery of gold within an oxidized zone in KZ20-02 with assays of:
 - 0.82 g/t Au over 12.27m (1.45 to 13.72m), including 2.2 g/t Au over 3.12m from surface (1.45 to 4.57m), within a larger interval of porphyry-style gold and copper mineralization

Financial Instruments

The Company is exposed in varying degrees to a variety of financial instrument related risks by virtue of its activities. The overall financial risk management program focuses on preservation of capital and protecting current and future Company assets and cash flows by reducing exposure to risks posed by the uncertainties and volatilities of financial markets.

The types of risk exposure and the way in which such exposures are managed are as follows:

Credit Risk - The Company's credit risk is primarily attributable to its liquid financial assets. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash and cash equivalents with high-credit quality financial institutions. The Company does not have financial assets that are invested in asset backed commercial paper. Other receivables are comprised primarily of tax receivables generated on the purchase of supplies and services for the Company's exploration programs, which are refundable from the Canadian government. The Company's maximum exposure to credit risk is the carrying amount of financial assets on the consolidated statements of financial position.

Liquidity Risk – The Company's cash and cash equivalents are invested in business accounts with high-credit quality financial institutions which are available on demand for the Company's programs.

Future operations or exploration programs will require additional financing primarily through equity markets.

The Company has lease obligations, the maturity of which are as follows:

	Total
	\$
Due within 1 year	104,100
Due in 2 years	83,400
Due in 3 years	28,000
	<u>215,500</u>

Market Risk – Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity prices.

Interest rate risk – In respect to the Company's financial assets, the interest rate risk mainly arises from the interest rate impact on cash and cash equivalents and term deposits. Every 1% fluctuation in interest rates up or down would have an insignificant impact on profit or loss.

Foreign currency risk - The Company is exposed to foreign currency risk to the extent that certain monetary financial instruments and other assets are denominated in United States dollars. The Company has not entered into any foreign currency contracts to mitigate this risk and has no financial instruments held in United States funds. Therefore, foreign currency risk is minimized.

Commodity price risk – The value of the Company's mineral resource properties is related to the price of various commodities and the outlook for them. Commodity prices have historically fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, industrial retail demand, central bank lending, forward sales by producers and speculators, level of worldwide production and short-term changes in supply and demand. The Company is not exposed to significant price risk.

Fair Value - The Company has various financial instruments comprised of cash and cash equivalents, trade and other receivables, investment in equities, trade and other payables and lease liabilities.

For disclosure purposes, all financial instruments measured at fair value are categorized into one of three hierarchy levels, described below. Each level is based on the transparency of the inputs used to measure the fair values of assets and liabilities:

Level 1 – Values based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.

Level 2 – Values based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability.

Level 3 – Values based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

Critical Accounting Estimates

The preparation of financial statements in compliance with IFRS requires management to make certain judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from these estimates and assumptions.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are continuously evaluated and reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

Significant accounting estimates

- a) The inputs used in accounting for share-based payments in profit or loss;
- b) The estimated carrying value and impairment amount of each mineral property, determined by the recoverable amount of the asset;
- c) The tax basis of assets and liabilities and related deferred income tax assets and liabilities; and
- d) Amounts of provisions for environmental rehabilitation and restoration.

Significant accounting judgments

- a) The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operation expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors including expectation of future events that are believed to be reasonable under circumstances; and
- b) The assessment of indications of impairment of each mineral property.
